SUMMARY

Innovative and detail-oriented web developer with over 5 years of experience in designing, developing, and maintaining responsive websites and web applications. Proficient in front-end and back-end technologies, including HTML5, CSS3, JavaScript, and various frameworks such as React and Node.js

WORK EXPERIENCE

Senior Software Engineer

Hectranet   *July 2022 - January 2024, Goa*

- As a dedicated member of the technical team, I have played a pivotal role in architecting and developing sophisticated portals tailored to the specific needs of our production department. Leveraging cutting-edge technologies such as React, I collaborated closely with my colleagues to design intuitive and efficient user interfaces, ensuring seamless navigation and functionality for our end-users.
- My involvement in these in-house projects extended beyond mere development. I actively contributed to the entire lifecycle of the portals, from conceptualization and design to implementation and ongoing maintenance. Through iterative feedback loops and agile methodologies, our team continuously refined and optimized the portals to align with evolving business requirements and user feedback.
- My passion for leveraging technology to streamline processes and enhance productivity drove me to explore innovative solutions and integrate advanced features into our portals. By staying abreast of the latest industry trends and best practices, I ensured that our solutions remained at the forefront of efficiency and usability

Software Engineer

Hectranet   *July 2020 - July 2022, Goa*

- As an integral member of the technical team, I played a central role in spearheading the frontend development efforts for our organization's portals tailored to the production department. Specializing in cutting-edge technologies like React, I collaborated closely with my team to craft intuitive and visually captivating user interfaces.
- My responsibilities encompassed the entire frontend development life cycle, from conceptualization to deployment. By leveraging React's robust capabilities, I ensured that our portals not only met but exceeded user expectations in terms of performance, responsiveness, and user experience.
- Through meticulous attention to detail and a keen eye for design, I translated complex requirements into elegant frontend solutions that streamlined workflows and enhanced user productivity. I actively participated in design discussions, offering insights and suggestions to optimize usability and accessibility.

Junior Software Engineer

Hectranet   *July 2018 - July 2020, Goa*

- In a digital marketing team, while officially a software engineer, I collaborated on website optimization, implemented tracking pixels, and automated marketing workflows. Demonstrated adaptability and interdisciplinary skills, contributing to team success.

PROJECTS

Group Mail

Hectranet • *July 2022 -May 2024*

- The Group Mail Portal served as the central application portal, facilitating various tasks such as VMTA building, campaign deployment, and seed generation. Crafted primarily with JavaScript and jQuery, it ensured seamless operation, contributing to expedited outcomes.
- The Portal was user friendly and catered to diverse needs of the production teams.

Net Admin

Hectranet • *April 2021 - February 2023*

- Net Admin was the major portal for resource allotments and management.
- I played a crucial role in revamping the Net Admin portal, enhancing its resource management and server administration capabilities.
- Improvements include streamlined server management, editing features, and an updated user interface for enhanced functionality and aesthetics.

Production App

Hectranet • *January 2021 - January 2022*

- Contributed to a production app tailored for the production team's requirements.
- Features included an Offer interface for offer management, a DWH for database management, a suppression and NS application for quality analysis, and a Mail App for campaign design and delivery.
- Played a major role in limiting and refining the design tailored to the specific needs of the production team.

Stopwatch 2.0

https://vikas-stopwatch2.netlify.app/ • *April 2024 - April 2024*

- This React Stopwatch offers a sleek interface for precise time tracking.
- Users can easily start, stop, pause, and reset the stopwatch, along with split and lap features.
- Utilizing modern web practices and React's architecture, it ensures optimal performance and usability.
- With its intuitive design, it's a valuable tool for efficient time management.

Vikas Keeps

https://vikaskeeps.netlify.app/ • *March 2024 - April 2024*

- 'Vikas Keeps' is a React app for note organization, featuring a user-friendly interface, robust authentication, and PostgreSQL integration for efficient data management.
- Security measures, including cloud storage and encryption, ensure user data protection.

EDUCATION

Bachelor of Engineering(Computer Science)

Goa University • Taleigao, Goa • 2018

• Cleared with First Class Distinction

CERTIFICATIONS

The Complete Web Development Bootcamp

2024

• Updated myself with all the latest technologies.

TECHNICAL SKILLS

Programming Languages : C/C++, Javascript

Libraries/Frameworks: React.js, Express.js, Jquery, Node.js, Webpack, Git, GitHub, HTML5, CSS3

Database: PostgreSQL, Supabase

Platforms: Netlify, Vercel
