SUMMARY

Innovative and detail-oriented web developer with over 5 years of experience in designing, developing, and maintaining responsive websites and web applications. Proficient in front-end and back-end technologies, including HTML5, CSS3, JavaScript, and various frameworks such as React and Node.js

WORK EXPERIENCE

Senior Software Engineer

Hectranet

July 2022 - January 2024, Goa

Architected and developed sophisticated portals tailored to the specific needs of the production department. Leveraged cutting-edge technologies such as React and collaborated closely with colleagues to design intuitive and efficient user interfaces, ensuring seamless navigation and functionality for end-users.

Contributed actively to the entire lifecycle of the portals, from conceptualization and design to implementation and ongoing maintenance. Employed iterative feedback loops and agile methodologies, continuously refining and optimizing the portals to align with evolving business requirements and user feedback.

Explored innovative solutions and integrated advanced features into the portals to streamline processes and enhance productivity. Stayed abreast of industry trends and best practices, ensuring solutions remained at the forefront of efficiency and usability.

Improved user feedback ratings by 20%

Software Engineer

Hectranet

July 2020 - July 2022, Goa

Spearheaded the frontend development efforts for the organization's portals tailored to the production department. Specialized in cutting-edge technologies like React, collaborating closely with the team to craft intuitive and visually captivating user interfaces.

Oversaw the entire frontend development life cycle, from conceptualization to deployment. Leveraged React's robust capabilities to ensure the portals not only met but exceeded user expectations in terms of performance, responsiveness, and user experience.

Translated complex requirements into elegant frontend solutions that streamlined workflows and enhanced user productivity through meticulous attention to detail and a keen eye for design. Actively participated in design discussions, offering insights and suggestions to optimize usability and accessibility.

Junior Software Engineer

Hectranet

July 2018 - July 2020, Goa

Collaborated with the digital marketing team on website optimization, implemented tracking pixels, and automated marketing workflows, despite officially being a software engineer.

Demonstrated adaptability and interdisciplinary skills, contributing significantly to the team's success.

TECHNICAL SKILLS

Programming Languages : C/C++, Javascript

Libraries/Frameworks: React.js, Express.js, jQuery, Node.js, Webpack, Git, GitHub, HTML5, CSS3, Bootstrap, Jest

Database: PostgreSQL, MySQL, MongoDB, Supabase

Platforms: Netlify, Vercel

PROJECTS

Group Mail

Hectranet • *July 2022 - Jan 2024*

The Group Mail Portal served as the central application portal, facilitating various tasks such as VMTA building, campaign deployment, and seed generation. Crafted primarily with JavaScript and jQuery, it ensured seamless operation, contributing to expedited outcomes.

The Portal was user-friendly and catered to diverse needs of the production teams.

Net Admin

Hectranet • *April 2021 - February 2023*

Net Admin was the major portal for resource allotments and management.

I played a crucial role in revamping the Net Admin portal, enhancing its resource management and server administration capabilities.

Improvements include streamlined server management, editing features, and an updated user interface for enhanced functionality and aesthetics.

Production App

Hectranet • *January 2021 - January 2022*

Contributed to a production app tailored for the production team's requirements.

Features included an Offer interface for offer management, a DWH for database management, a suppression and NS application for quality analysis, and a Mail App for campaign design and delivery.

Played a major role in limiting and refining the design tailored to the specific needs of the production team.

Vikas Keeps

<https://vikaskeeps.netlify.app/> • *March 2024 - April 2024*

'Vikas Keeps' is a React app for note organization, featuring a user-friendly interface, robust authentication, and PostgreSQL support ensuring efficient data management.

Security measures, including cloud storage and encryption, ensure user data protection.

Stopwatch 2.0

<https://vikas-stopwatch2.netlify.app/> • *April 2024 - April 2024*

Sleek React Stopwatch for precise time tracking with start, stop, pause, reset, split, and lap features.

Utilizes modern web practices and React architecture for optimal performance, usability, and intuitive design, enhancing efficient time management.

EDUCATION

Bachelor of Engineering(Computer Science)

Goa University • Taleigao, Goa • 2018

Cleared with First Class Distinction

CERTIFICATIONS

The Complete Web Development Bootcamp

2024

Completed the bootcamp to update and enhance skills, ensuring proficiency in the latest technologies and industry practice.
